

COMTECH AEROASTRO ANNOUNCES NEW BUSINESS UNIT

April 8, 2011, Comtech AeroAstro, Inc. announces a new business unit to better align itself to emerging market opportunities.

Today Comtech AeroAstro announces it has created a new business unit to serve its customers in the civil, commercial and international markets. Stanley O. Kennedy, Jr., Vice President and General Manager of Civil, Commercial and International Programs will lead the new unit. The business unit will focus on providing CAA's enabling technologies in standard interface, flexible, low cost satellites and satellite components to a new and emerging customer base. Comtech AeroAstro also announces that Steven Schenk has been promoted to Vice President and General Manager of Defense Programs and will lead the company's efforts with its more traditional customers in the defense market.

Stanley Kennedy, formerly CAA's VP and GM of Programs has 26 years of hands-on experience in satellite development and an extensive understanding of the civil, commercial, and international marketplace. Mr. Kennedy is an Associate Fellow with the American Institute of Aeronautics and Astronautics, is active with the Aerospace Industries Association on ITAR and export reform and international outreach initiatives and the architect of many of CAA's innovative technology developments. Prior to Comtech AeroAstro, Stan held positions at Lockheed Martin Space Systems Corporation and General Dynamics Advanced Information Systems.

Steven Schenk who formerly led Comtech AeroAstro's Advanced Concepts group has over 20 years experience developing satellite systems at CAA, with Spectrum Astro and at General Dynamics. Steve has managed or been a significant contributor on numerous satellite programs to include GLAST, the DARPA Streak Program, MightySat II, the MSTI series, CAA's Antares design and now the CAA JMAPS Program.

"We are excited about our business prospects going into the future" said Paul Lithgow, President of Comtech AeroAstro. "We developed some key technology enablers and assembled a first rate team of space system development professionals that are making a difference in our industry."

Ashburn, Va.-based Comtech AeroAstro, Inc., is a wholly owned subsidiary of Comtech Telecommunications Corporation (NASDAQ:CMTL) in Melville, NY.
